

## Selectmen's Report.

---

*To the Taxpayers of West Rutland:*

We respectfully submit the following report of town officers for the year ending February 15, 1908:

The selectmen have expended in the several departments \$11,161.00, which is \$324.40 less than the previous year. The damage to sheep was \$496.60, which necessitated our drawing on the surplus dog fund which has been accumulating for several years, leaving only \$238.20 of this fund in the treasury.

There is included in the general account \$1,000.00 for stone crusher, \$500.00 for building new road, and \$263.30 for cutting brush, which are extraordinary expenses. The town debt has been reduced by paying bond number 2 of \$1,000.00, leaving the bonded indebtedness \$21,000.

According to vote at last annual meeting the Selectmen asked for bids for lighting streets for five years, and received two bids, one from the Vermont Marble company of \$1,800 per year for same number lamps as are used at the present time, and one from the Rutland Railway Light & Power company of \$2,148.64. The contract was let to the Vermont Marble company for a term of five years beginning February 1, 1908.

We would recommend a town tax of 45 cents on the dollar of the grand list for the ensuing year. This, with a 50-cent school tax and the other state and town taxes, would make a total of 130 cents, or 22 cents less than was raised the preceding year. With this tax and the surplus now in the treasury of \$2,894.59 belonging to the general account, we think the town could pay the United States surplus fund of \$5,678.74, which is now due the State, and upon which the town will have to pay interest at the rate of five per cent. until paid. We recommend the payment of this fund.

W. A. THRALL,  
GEO. C. ROBINSON,  
DANIEL O'ROURKE,  
*Selectmen.*

N. J. FULLER,  
Road Commissioner.

## School Directors' Report.

*To the Taxpayers of West Rutland:*

Your Board of Directors, on assuming charge of the school buildings of the town, inspected the same and report their condition as follows:

The high school building, known as No. 21, we found in good condition, excepting the rear wall, which we found bulged outward. The walls of this building are brick veneered, and the bulging is a common fault in buildings of this kind. It will have to be watched and repaired some time.

The closet system in use at this building will have to be changed as soon as the weather will permit. The present system, which is simply surface, is dangerous to the health of the scholars and the people living in the vicinity.

We have asked for plans and estimates for a sanitary underground system, and have been advised that the same will cost about \$300. This building also should have a fire escape. We have plans and estimates for this also, and have been advised that a structure such as we think necessary will cost about \$450. The equipments in this building, including the heating apparatus, we found in good condition.

The building known as No. 7 we found to be in good condition, except that the floors are worn badly and will have to be replaced within a year or two at the most. We have had doors cut through the partitions on the second floor, so that there are three means of exit from each room, making a practical fire escape at

little cost. The heating apparatus and other equipments in this building are in good condition.

The building known as No. 8, in the "Hollow," needs an addition built as soon as possible, as it is entirely too small for the demand made on it at present. We suggest that an ell be built on the east side of the present building, and of about the same dimensions as the old building, which would cost about \$600. This of course would mean another teacher, and other costs, but the present system is entirely unsatisfactory to scholars and teacher. There are between 50 and 55 pupils attending this school at present, on floor space about 18 feet square.

The building known as No. 9 we found in good condition.

The building known as No. 6 we have had repaired, and is at present in good condition.

The building known as Central Building has been added to your town system the past year. That part of the building containing the school room is in fairly good condition.

School Directors.

#### Report of Superintendent of Schools.

In accordance with law, I herewith submit the annual report of the Superintendent of Schools.

In my judgment, a fire escape should be placed in the village school. There is only one exit, and should this building catch fire in or near this exit, over four hundred pupils would be penned

in. The only means of escape left would be the windows. To jump from the second and third floor is not a desirable feat.

The open quarry at the head of Campbell avenue is an unsafe place for the general public, and especially perilous for the many school children who pass it when they are going to and from school. Its nearness to the playground is an added source of anxiety. To do away with this danger is probably beyond the jurisdiction of the school board, but could not something be done to make it less dangerous?

It seems to me that a ventilating system could be put into the village school with little expense by utilizing the chimneys which, in the former system of heating, were used for that very purpose. Since the rooms are now ventilated through open windows, many are necessarily exposed.

The water closets of our two largest school houses are, at their best, not only cesspools on the top of the ground but also a source of exposure for the pupils who are obliged, at times, to go through mud, water and inclement weather to reach them. Since there is aqueduct water in both buildings, perhaps, some system could be put in fit for human beings.

In district No. 8, there are so many pupils in various grades that it is a pedagogical puzzle to see how one teacher can do very much. Is it justice to the taxpayers and the children of that vicinity to have educational advantages inferior to those enjoyed by the rest of the town? I can see only two ways to improve conditions there: transportation which is not practical; the employment of two teachers, and therefore, an addition to the present building.

From an educational point of view, the greatest need of our schools is expert supervision. This ought to give unity, guidance, and many other advantages to all the work of our schools. If two or three towns unite in employing such a superintendent, the state pays a large part of his salary.

The State Superintendent of Education has classified our High School as a first class legal High School.

Respectfully submitted,

F. W. CARRIER,  
Superintendent of Schools.

R. F. CRAWFORD, Collector.	

## Librarian's Report.

There have been 6,470 books loaned during the year ending February 15, 1908.

Fifty-three books have been purchased. Thirty-seven of these were new books and sixteen were to replace books which were worn out.

The tables have been supplied with the leading periodicals as in past years.

Thirteen dollars and sixty-six cents have been received from book fines, sale of cards and catalogues. Ten dollars and twenty-one cents of this has been used for necessary supplies. The balance of three dollars and forty-five cents will be turned over to the treasurer.

AGNES N. CARMODY,  
Librarian.

H. H. BROWN, TREASURER, IN ACCOUNT WITH LIBRARY ASSOCIATION.
